

INSTALLATION OF BURMON-ICFWL TO ICF WALL

- 1** Flick a chalk line and mark the on-center spacing.

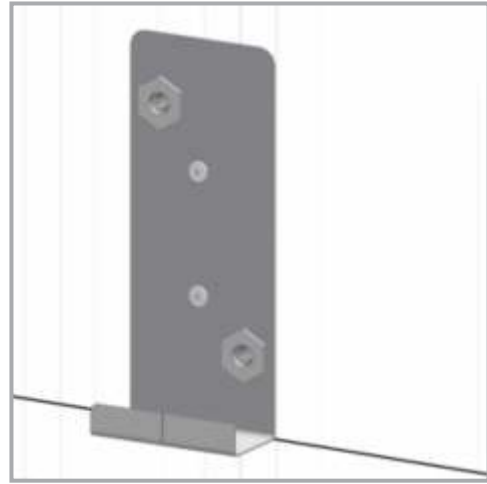

- 2** Using the BURMON-ICFWL Ledger Bracket as a template, mark the hole locations in the ICF wall.

- 3** Use the supplied spade point bit to drill $\frac{7}{8}$ -inch wide holes.

- 4** Insert the assembled BURMON-ICFWL flush to the face of the ICF wall.

- 5** Place concrete (minimum f'c = 2500 psi)

Installation Tip: Use screws through holes in Ledger Bracket and into web to hold Burmon-ICFWL in place during concrete pour.

INSTALLATION OF WOOD LEDGER TO BURMON-ICFWL

- 1 After the concrete has cured and the ICF wall has settled, place the wood ledger inside the cradle of the BURMON-ICFWL on the ICF wall.

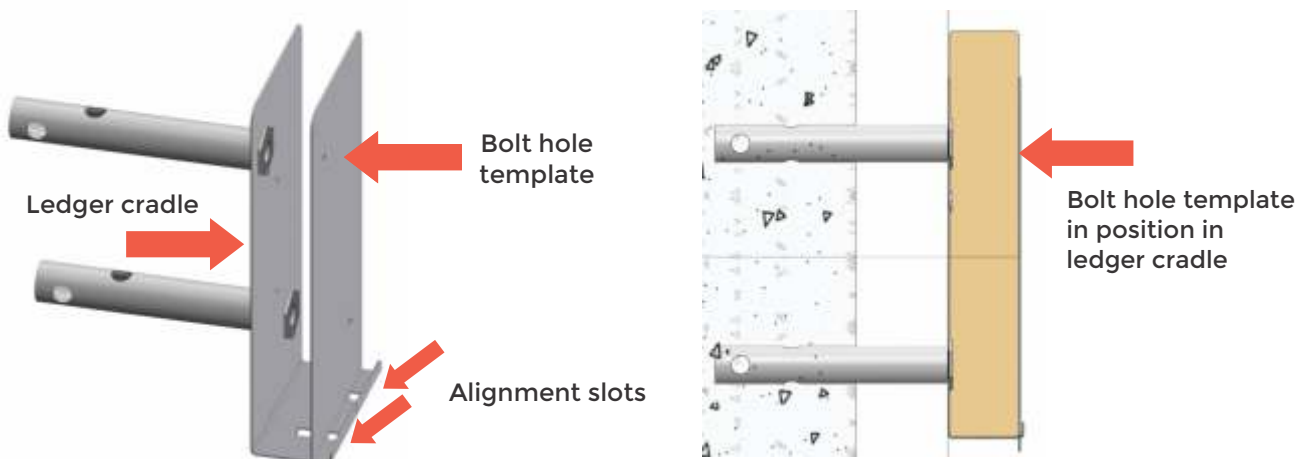

- 2 Check ledger bracket for correct height and level

Chalk line

- 3 Place the Bolt Hole Template into the ledger cradle and slip into slots provided.

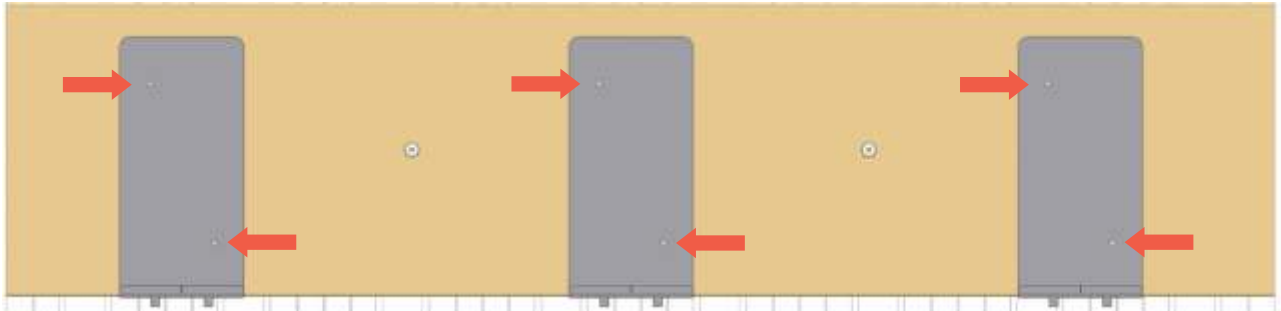

IMPORTANT NOTE: For drilling the holes in the wood ledger, use a **hole depth guide** so not to damage the threads of the cylinder bolt hole.

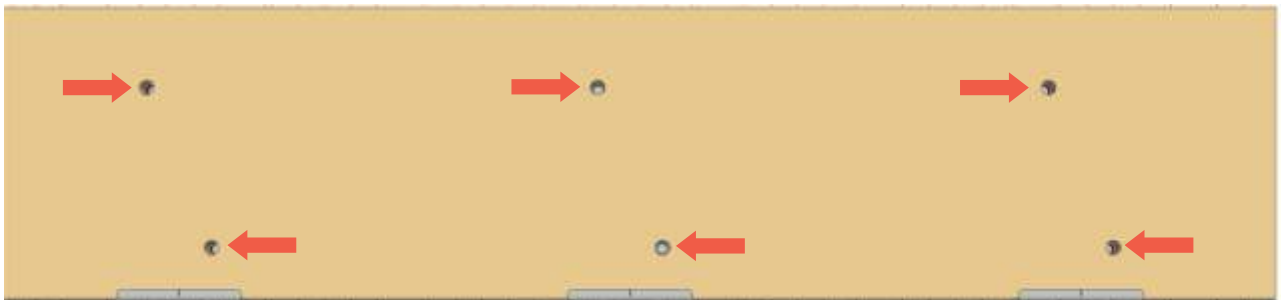

- 4** Drill pilot holes with a 13/64" drill bit.

 13/64" drill bit

- 5** Enlarge pilot holes using a 9/16" drill bit.

 9/16" drill bit

- 6** Bolt the ledger board to the **BURMON-ICFWL** using the Hex Head bolts and washers supplied. Tighten securely.
